

- Sec.  
 1417. Duration of licenses and permits.  
 1418. Diligence requirements.  
 1419. Protection of the environment.  
 1420. Conservation of natural resources.  
 1421. Prevention of interference with other uses of the high seas.  
 1422. Safety of life and property at sea.  
 1423. Records, audits, and public disclosure.  
 1424. Monitoring of activities of licensees and permittees.  
 1425. Relinquishment, surrender, and transfer of licenses and permits.  
 1426. Public notice and hearings.  
 1427. Civil actions.  
 1428. Reciprocating states.
- SUBCHAPTER II—TRANSITION TO INTERNATIONAL AGREEMENT
1441. Declaration of Congressional intent.  
 1442. Effect of international agreement.  
 1443. Protection of interim investments.  
 1444. Disclaimer of obligation to pay compensation.
- SUBCHAPTER III—ENFORCEMENT AND MISCELLANEOUS PROVISIONS
1461. Prohibited acts.  
 1462. Civil penalties.  
 1463. Criminal offenses.  
 1464. Enforcement.  
 1465. Liability of vessels.  
 1466. Civil forfeitures.  
 1467. Jurisdiction of courts.  
 1468. Regulations.  
 1469. Omitted.  
 1470. Authorization of appropriations.  
 1471. Severability.  
 1472. Deep Seabed Revenue Sharing Trust Fund; establishment.  
 1473. Revenue and customs or tariff treatment of deep seabed mining unaffected.

#### § 1401. Congressional findings and declaration of purpose

##### (a) Findings

The Congress finds that—

(1) the United States' requirements for hard minerals to satisfy national industrial needs will continue to expand and the demand for such minerals will increasingly exceed the available domestic sources of supply;

(2) in the case of certain hard minerals, the United States is dependent upon foreign sources of supply and the acquisition of such minerals from foreign sources is a significant factor in the national balance-of-payments position;

(3) the present and future national interest of the United States requires the availability of hard mineral resources which is independent of the export policies of foreign nations;

(4) there is an alternate source of supply, which is significant in relation to national needs, of certain hard minerals, including nickel, copper, cobalt, and manganese, contained in the nodules existing in great abundance on the deep seabed;

(5) the nations of the world, including the United States, will benefit if the hard mineral resources of the deep seabed beyond limits of national jurisdiction can be developed and made available for their use;

(6) in particular, future access to the nickel, copper, cobalt, and manganese resources of the

deep seabed will be important to the industrial needs of the nations of the world, both developed and developing;

(7) on December 17, 1970, the United States supported (by affirmative vote) the United Nations General Assembly Resolution 2749 (XXV) declaring inter alia the principle that the mineral resources of the deep seabed are the common heritage of mankind, with the expectation that this principle would be legally defined under the terms of a comprehensive international Law of the Sea Treaty yet to be agreed upon;

(8) it is in the national interest of the United States and other nations to encourage a widely acceptable Law of the Sea Treaty, which will provide a new legal order for the oceans covering a broad range of ocean interests, including exploration for and commercial recovery of hard mineral resources of the deep seabed;

(9) the negotiations to conclude such a Treaty and establish the international regime governing the exercise of rights over, and exploration of, the resources of the deep seabed, referred to in General Assembly Resolution 2749 (XXV) are in progress but may not be concluded in the near future;

(10) even if such negotiations are completed promptly, much time will elapse before such an international regime is established and in operation;

(11) development of technology required for the exploration and recovery of hard mineral resources of the deep seabed will require substantial investment for many years before commercial production can occur, and must proceed at this time if deep seabed minerals are to be available when needed;

(12) it is the legal opinion of the United States that exploration for and commercial recovery of hard mineral resources of the deep seabed are freedoms of the high seas subject to a duty of reasonable regard to the interests of other states in their exercise of those and other freedoms recognized by general principles of international law;

(13) pending a Law of the Sea Treaty, and in the absence of agreement among states on applicable principles of international law, the uncertainty among potential investors as to the future legal regime is likely to discourage or prevent the investments necessary to develop deep seabed mining technology;

(14) pending a Law of the Sea Treaty, the protection of the marine environment from damage caused by exploration or recovery of hard mineral resources of the deep seabed depends upon the enactment of suitable interim national legislation;

(15) a Law of the Sea Treaty is likely to establish financial arrangements which obligate the United States or United States citizens to make payments to an international organization with respect to exploration or recovery of the hard mineral resources of the deep seabed; and

(16) legislation is required to establish an interim legal regime under which technology can be developed and the exploration and recovery of the hard mineral resources of the
